## INTERfit Flash Studio Kits

### Venus 150

Please note : This product is not available in 110 volt countries (USA/CANADA)

### Venus 300

Item No : INT170 (150 watt head) Lamp No : INT515 (60 watt)

Item No : INT172 (300 watt head) Lamp No : INT515 (60 watt)

The Venus range has a uniquely stylish and compact design, that is lightweight yet very robust, with a smooth rubberized case. Venus features include: user changeable flash tubes, "S" type bayonet fittings, (compatible with all Stellar accessories) stepless power adjustment over a 4 f-stop range, ensuring the exact amount of light required and 5 volts Sync voltage making it highly suitable for use with all current digital and film cameras.

The Venus range of studio lighting is packed with technological enhancements designed to offer excellent performance and user convenience. Building on the achievements of the EX and Stellar ranges introduced in 2005, the Venus 300 and 150, offers full analogue control together with cutting edge features at an affordable price. Made from ABS plastic with a rubberized finish the Venus units offer a lightweight and portable unit that will stand up to the day to day workings of the semi-pro photographer.

The Venus has to be the the unit of choice for the semi-pro or serious hobbyist photographer on the move with easy to use controls and a choice of seven kits including a three head kit, which when combined with the backgrounds available from Interfit will make you stand out from the crowd, for portraits, products or wedding photography. Both the 150 & 300 Venus heads recycle in 1.5 seconds with both audible and visual confirmation. High guide numbers compliment the compact body design (150 Gn39 - 300 Gn55). Infra red flash triggering also available when used with an INT411 trigger or you have the ability to use the Interfit single channel radio triggers. (INT412)

A wide range of kits, is available in the Venus range, with a choice of twin umbrella, umbrella / softbox or a twin softbox kit. Each kit comes with 2 heads and stands as below.
